DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. **Claims 1-12**, drawn to a scatterometry target, classified in class 356, subclass 620.
 - II. **Claims 13-18**, drawn to a method of monitoring a photolithographic process, classified in class 356, subclass 237.2.
2. **Inventions I and II** are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product. See MPEP § 806.05(h). In the instant case Invention I can be practiced in a process for measuring overlay or in a process for calibrating a scatterometric system using a calibration target.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
